

HERITAGE AND BUILT ENVIRONMENT MONITORING REPORT 2017-18

Introduction	1
Indicator HB1 Listed buildings at risk	2
Indicator HB2 Shopfronts and advertisements in conservation areas SPD	5

Introduction

The purpose of this report is to provide an update to the Borough's progress in meeting all Historic Environment related indicators. It covers the period 01st April 2017 to 31st March 2018 (the monitoring period).

The indicators contained in this monitoring report are those considered to provide relevant information on the production and monitoring of Bedford Borough Council's Local Development Documents. The requirement of the Localism Act 2011 is merely that authorities must make their monitoring reports publicly available and for them to cover an appropriate period of time.

Saved policies in the adopted Local Plan 2002 are still used to determine planning applications whilst newer planning policy documents are drafted. As new documents are adopted they replace the corresponding older polices in the 2002 Local Plan. Therefore, this monitoring report monitors both the adopted Bedford Borough Local Plan 2002 as well as more recently adopted Local Development Documents such as the Core Strategy and Rural Issues Plan, the Bedford Town Centre Area Action Plan and the Allocations and Designations Local Plan.

This report covers Heritage and Built Environment monitoring, including the historic environment, listed buildings and the impact of those policies and documents related to heritage.

The Church of All Saints, High Street, Turvey, Grade I, has now been removed from the national register following repair works being undertaken. The Congregational Chapel in Roxton, Grade II* is now identified as in very bad condition and is in priority category A rather than C. This means the building is at immediate risk of further rapid deterioration or loss of fabric, no solution has been agreed (as per Historic England's website). The thatch is moss covered and deteriorating, there is evidence of water ingress and of rotting structural timbers at the wall plate and at the east end of the chapel; re-thatching is required. There have been no changes to the number of buildings on the local at risk register.
