Bedford Borough Council

Permit Scheme Evaluation Report - Year 5

This document has been produced for Bedford Borough Council

No part of this document may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic mechanical, photocopying, or otherwise, without either prior written permission of the owner(s).

From the NRSWA Manager;

Looking back over the last year, I feel that our Permit Scheme has now settled in and it seems difficult to believe that we ever had just a notice system running!

Response codes have been working well, and give a good indication of why permits are not being granted. Looking at the data, it is obvious that Utilities need to place in more accurate information, and appropriate conditions, as incorrect or missing NCT's is the largest response code used. The use of 'RC31, conflict of works' is the second most used response code, and this shows that conflicts on the network are being avoided on a daily basis, due to the Authority being able to co-ordinate works in a better, more planned manner.

It is with disappointment that I have yet again to report that there is very little collaboration taking place, even with this Authority actively encouraging collaboration whenever possible. Whilst we have managed to promote some works within existing road closures, there seems a real lack of will amongst works promoters to work together within the highway.

The use of advance warning signs is still seen as a bonus for residents and motorists alike, and we have received positive feedback for these, as a quick and easy way to communicate notice of works/disruption to members of the public. Whilst I realise that supplying these can be tiresome for the works promoter, I do really feel that the benefits of providing information to residents and the travelling public alike, easily outweigh the inconvenience of erecting these signs.

The permit volumes have not yet increased to the volumes that we had in year 1, but we have had a succession of major work projects this year, most of which have gone well. Co-ordinating a site in Clapham, where Cadent Gas, Anglian Water and then our own re-surfacing team all had major work, proved challenging, but worked well, with both Utility works finishing before the road was re-surfaced. A good result, but only after a considerable amount of co-ordination and planning was undertaken.

Challenges for the coming year(s) include numerous development works, which could prove challenging to co-ordinate, with pressure to allow works on the highway in order to get works started, have the Utilities in place, and to complete as soon as practicable so that houses can be occupied, or commercial buildings opened for use. Other non-work related issues may be the proposed Street Manager project, which could mean major changes in how permits are processed, but, as this is in its infancy at the time of writing, any impact is unknown.

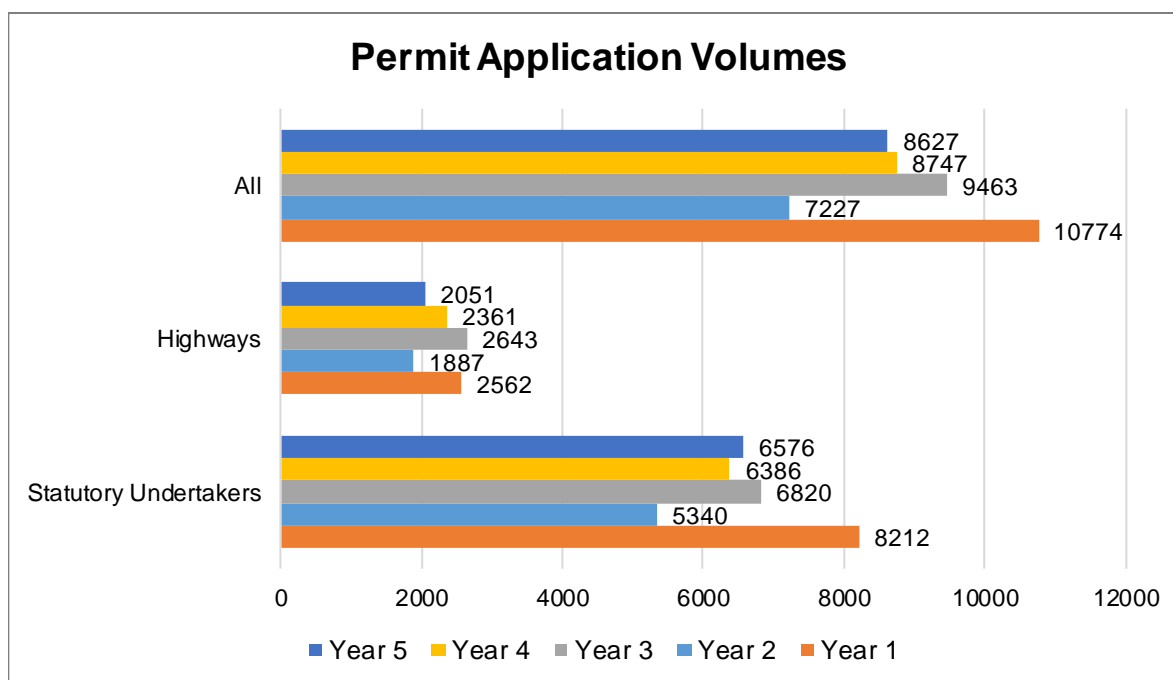

I look forward to continued co-operation with all works promoters, to make the Borough of Bedford a place with as little disruption to traffic movement as possible, smooth and reliable public transport and, of course satisfied and informed residents.

Lilian Drew,

NRSWA Manager (December 2017)
