Meeting minutes:

Item	Text	Action
1.	<p>Mode Share Forecasting</p> <ul style="list-style-type: none"> Developed using census data, policy documents and surveys. Informed by housing growth projections. Need to use the station choice model to assess the catchment area for mode share targets and parking. <p>Active Travel and NMU Network</p> <ul style="list-style-type: none"> Interventions grouped into access to stations, severance mitigation and wider network initiatives. Early-stage route planning with developer coordination and environmental considerations. Emphasis on compliance with LTN 1/20 and flexible adaptation to evolving development plans <p>Bus and Parking Strategy</p> <ul style="list-style-type: none"> Bus strategy focuses on integrating rail and bus services, modifying routes and frequencies based on demand. Parking strategy aligns with sustainable transport goals, EV infrastructure, and proximity to Universal Studios. Both strategies support reduced car reliance and improved multimodal connectivity.
