

Sustainable Development and Environmental Efficiency Strategy Action Plan 2022/23

For more information, please contact @ climatechangefund@bedford.gov.uk

Priority 1- Demonstrating Community Leadership

| | | Reduce energy and carbon emissions | across the Councils estate | |
|-----------|---|---|---|---|
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL1 | Publish annual Greenhouse Gas Report | Report will be completed in accordance with current guidance from Business, Energy and Industrial Strategy (BEIS previously DECC). | Assessment of our annual performance against our reduction target | Business Development & Environmental Efficiency Team |
| DCL2 | Deliver energy reduction programme | Implement the energy reduction programme | Completion of all projects, reduced electricity and fuel consumption for the Council | Business Development & Environmental Efficiency Team/ Estate Management |
| DCL3 | Monitor and target energy usage, identifying areas of energy wastage and opportunity | Utilise energy/water management software to monitor and target energy usage | Able to use lessons learned from existing measures to determine what would be effective elsewhere | Business Development & Environmental Efficiency Team |
| DCL4 | Valid Display Energy Certificates and Advisory Reports in place for all sites | Produce and display (where applicable) up to date certificates and advisory reports for all sites | Comply with legislation and valid Display Energy Certificates displayed at all sites and Advisory Reports in place | Business Development & Environmental Efficiency Team |
| DCL5 | Support opportunities to reduce consumption from street lighting | Investigation into what street lighting is necessary and whether some can be switched off. | Reduced energy usage if consumption is reduced. Reduced dependency on the national grid. | Highways |
| DCL6 | Develop battery storage or other income generation/ energy stability schemes | Investigate income possibilities from leasing Council land or benefits from developing battery storage for our own energy requirements | Increase income opportunities for the Council | Business Development & Environmental Efficiency Team/Design Services Team |

| | 1.2 Sup | port local communities to reduce energy | rgy costs and carbon emissions | |
|-----------|---|--|--|--|
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL7 | Improve residents' knowledge of Warm Homes and fuel poverty in Bedford Borough | To distribute information regarding Warm Homes and fuel poverty through existing networks and sign post residents to organisations (e.g. Age UK) for advice | Increased a wareness in the community of services available, and increased uptake where meas urable. | Public Health, Environment |
| DCL8 | Provide resources for residents and businesses on how to become more energy efficient | Webpage, social media, newsletters. Promote schemes such as Solar Together. | Reduction in carbon emissions from residents and businesses. Improved knowledge on environmental issues. | Business Development & Environmental Efficiency Team |
| DCL9 | Promote the Mayor's Climate Change Fund | Contract community organisations, schools, not-for-profits and public sector bodies to promote the fund. Promote on social media. | Encourage take up in this fund up until it closes in March 2024. Reduction in carbon emissions from community buildings. | Business Development & Environmental Efficiency Team |
| | 1.3 | Reduce water usage and assess oppo | ortunities for water saving | |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL10 | Continue to enforce Building Regulation water consumption standards. | All applications to the Council's Building Control service are checked for compliance with the Building Regulations. | Reduced water consumption | Building Control |
| DCL11 | Continue using planning policy that requires higher Building Regulation water efficiency standard for new dwellings. | Local Plan policy adopted January 2020. Subject to central government changes to Building regulations and the upcoming future homes standards, planning policy will be updated as and when new legislation is released. | Reduced water consumption | Building Control/Planning |
| DCL12 | Identify any areas where water projects can be implemented | Complete water audits in Council buildings | implement any appropriate projects to reduce water consumption | Business Development & Environmental Efficiency Team / Design Services |

| DCL13 | Encourage drought resistant planting to reduce the need for watering | Review parks and open spaces procedures to ensure practices are considering water efficiency | Improve water efficiency in parks and open spaces | Business Development & Environmental Efficiency Team |
|-----------|--|--|---|--|
| DCL14 | Improve accuracy of water bills | Conduct a water audit of water bills, including tariff checks and usage benchmarking | Reduce water bills | Business Development & Environmental Efficiency Team |
| DCL15 | Raise a wareness of water us age | Develop a water handbook for building managers | Improved knowledge of how to reduce water usage leading to a reduction in water bills | Business Development & Environmental Efficiency Team |
| | | 1.4 Reduce emissions from Counc | il owned transport | 1 |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL16 | Improved knowledge of Council transport emissions | Complete the annual Green House Gas reports | Use figures from the report to identify any a reas of improvement and suggest to the relevant team | Business Development & Environmental Efficiency Team |
| DCL17 | Reduce mileage and emissions from Fleet Vehicles | Route Optimisation and improve logistics of fleet vehicles | Use data to configure the most efficient routes to reduce mileage and emissions | Fleet |
| DCL18 | Increased knowledge and reduced emissions | Evaluate driver performance in relation to activities that increase fuel consumption through harsh acceleration, braking and cornering. Poorly performing drivers will then be required to undertake a level of training to improve their performance to ensure they are meeting their expected levels. | Drivers increased knowledge on efficient driving techniques resulting in reduction of emissions | Fleet |
| DCL19 | Reduce idling in fleet vehicles | Use Teletrak Navman idling information to monitor vehicle idling statistics. Data is reviewed and disseminated to service | A targeted approach to reduce operatives idling times on their vehicles | Fleet |

| | | areas to discuss with drivers where a follow-up is needed. | | |
|-----------|--|---|--|--|
| DCL20 | Compliant and environmentally efficient vehicles | Going forward, no further Internal Consumption Engine (ICE) vehicles will be purchased without prior agreement. An assessment of all non-Euro 6 vehicles is currently underway. The number of BEV fleet is due to increase significantly during 2022-23. Ongoing preventative maintenance from the Councils works hop ensures that the fleet is operating at the optimum level possible. | Vehicles are more efficient and produce less harmful impacts on the environment | Fleet |
| DCL21 | Increased use of the electric pool bikes | Incentivise the use of Bedford Borough Council's pool of electric bikes | Staff will not be claiming personal mileage back, staff absenteeism reduces the fitter they become from cycling, good for congestions and air quality and the general health of the population. This will reduce the CO2 emitted by staff travel and therefore contribute to the carbon neutral target (direct) | Sustainable Transport |
| | 1.5 Support schools/acaden | nies in the Borough to reduce their en | ergy and water use and use sustainable | transport |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL22 | Support schools/academies to develop and implement energy management initiatives | Delivery of EnergySLA (to those schools/academies signed up) | All schools/academies set up to access energy/water management software, delivery of annual energy and water seminar, case studies developed, quarterly emails distributed to all schools/academies, energy handbook circulated to all schools/academies | Business Development & Environmental Efficiency Team |

| DCL23 | Support schools/academies to develop and implement water management i nitiatives | Development and delivery of Water SLA (to thoseschools/academiessigned up) | Number of schools/academies signed up to a water SLA. All schools/academies set up to access energy/water management software, delivery of annual energy and water seminar, case studies developed, quarterly emails distributed to all schools/academies, water handbook circulated to all schools/academies | Business Development & Environmental Efficiency Team |
|-----------|--|---|--|--|
| DCL24 | Promote external funding and sustainable school initiatives | Send regular communications to schools on schemes such as Eco Schools, Ashden Schools, Salix Finance | Regular articles included in finance, governor and ASPIRE newsletters, initiatives discussed/represented at annual energy and water seminar | Business Development & Environmental Efficiency Team |
| DCL25 | Encourage more children to walk, cycle and scoot to school. | Nominated Council officer working with key schools in the Borough to encourage behavioural change and develop School Travel Plans using Modeshift STARS, continuation of the Bike It programme and implantation of WOW projects. | As pirational aim to increase the number of children walking, cycling or scooting to school. Aim for a rolling programme of engagement and accreditation with schools. | Transport & Highway Policy Team / Children's Services (planning) |
| | | 1.6 Support our st | aff | |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL26 | Deliver an energy and water awareness learning programme to staff | Reassess changes in energy use due to COVID-19. Staff Climate Change and Sustainability e-learning courses. | Staff have improved level of a wareness on how their role impacts on energy and water usage, a chievement of CO2 reduction targets | Business Development & Environmental Efficiency Team |
| DCL27 | Enable access to environmental efficiency information for Council staff | Energy, water and sustainability information available via the Council's website and intranet | Links regularly circulated to highlight new and updated information via internal bulletins | Business Development & Environmental Efficiency Team |

| DCL28 | Reduce staff business mileage | Promote sustainable travel options to staff. Develop Borough Travel Plan Adoption of Agile Working. Introduction of the EV pool cars and ebikes for staff. | Staff given more options on where and how they can work as well as how they travel to work. Have Agile Working policies in place. | Transport & Highway Policy Team/Business Development & Environmental Efficiency Team |
|-----------|--|---|---|---|
| DCL29 | Reduce business mileage | Promote sustainable and active travel options with selected businesses within the borough | To increase active travel to work by promotion and behaviour change techniques. | Transport Policy Team / Sustainable Transport Team / Business Development & Environmental Efficiency Team |
| | 1.7 Improving efficienci | es in waste disposal, increasing recyc | ling performance & reducing waste to la | ndfill |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL30 | Optimisation of residential and trade waste collection rounds to improve efficiency and time taken to make collections, and reduce carbon emissions produced by Council vehicles. | Implementing Collective (Bartec) in all commercial RCVs to manage commercial and domestic customer's account and collections. Route optimisation is undertaken every few years to make sure the most efficient routes are in place. | Improving the efficiency of the vehicles by not making wasted journeys. | Business Development & Environmental Efficiency Team, Refuse and Recycling Operations |
| DCL31 | Update account records to ensure email addresses are held to facilitate electronic communication as standard. | Implementing the Collective (Bartec) to record commercial customer's account and collection rounds. | Improving the efficacy of a ccounts management and reducing paper/mailings us ed to 0. | Business Development & Environmental Efficiency Team |
| DCL32 | Optimisation of residential collection and increase incentive to recycle to help achieve the UK binding target of 65% of municipal waste by 2035 and have less than 10% going to landfill by 2035. | Monitor the change to alternate weekly collections | Increased recycling, reduce waste sent to landfill | Waste and Recycling, Refuse and Recycling Operations |

| DCL 33 | A new target has been proposed by Government in relation to waste reduction i.e. to reduce waste (excluding major mineral waste) to 50% of 2019 levels by 2042. | This will require changes in collection of waste through the Government waste reforms which are not fully published as yet. | Contributing to consistency in recycling collections a cross the country including weekly collection of food waste so less waste is landfilled and energy recovered. | Business Development & Environmental Efficiency Team, Refuse and Recycling Operations |
|-----------|--|--|---|--|
| | 1.8 Assist our partne | ers and stakeholders in monitoring an | d reducing energy and water consumption | on |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL34 | Improved communication with partners and stakeholders | Provide the option for partners and stakeholders to have access to online tools (Energy Viewer and MyCorona) | Partners and Stakeholders able to view and monitor their energy and water consumption online providing the opportunity to reduce consumption | Business Development & Environmental Efficiency Team |
| | 1.9 Pror | note green infrastructure and biodive | rsity across the Council estate | |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL35 | Work through the Council's site management plans to improve the management of the Council estate that promotes biodiversity, natural habitats and adaptation to climate change | Review of biodiversity value of parks and open spaces through regular updates of existing management plans and creation of new management plans where needed. Continue to promote and collect information in accordance with the County Wildlife Site (CWS) in Positive Conservation Management (PCM) for Local nature/conservation biodiversity indicator (DEFRA 160) (formally NI197). | Improved management of biodiversity and continued compliance with DEFRA 160 | Clean Safe and Green |

| DCL36 | Develop a Tree Strategy and Tree Risk Assessment Management Policy to promote tree planting and the protection of the existing tree stock, through consultation with relevant service areas, which will address the reduction of air pollutants, reduction of rapid run off, the provision of urban cooling and carbon sequestration. | Promote the Tree Management Guide which is available on the Council's webs ite. Complete the Road Risk policy which is currently in draft form. | Increased tree protection under the strategy and to work towards the added benefits of reducing air pollutants, rapid run off, provision of urban cooling and carbon seques tration | Clean Safe and Green |
|-----------|--|--|---|----------------------|
| DCL37 | Investigate how to measure carbon sequestration from our existing tree stock | Going forward, use I Tree to measure the carbon sequestration from increasing tree stock | Understand the total carbon stored and net carbon annually sequestered from trees planted | Clean Safe and Green |
| | 1.10 | Encourage green practices and procu | rement within the Council | |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| DCL38 | Encourage selection of products and services that minimise environmental impacts, including looking to commission and procure energy-efficient products and services | Embed greener procurement within the Council processes and encourage suppliers to provide information on environmental impacts, energy efficiency and sustainability. This will be achieved in two areas: 1. Environmental impact assessment 2. testing supplier responses in relation to the specified requirements. 3. Clauses in all contracts | Council makes sustainable choices on products and services to reduce impact on environment | Procurement |

| DCL39 | Promote the use of E- procurement throughout the organisation | Promote E-Procurement virtual training where a pplicable. Ensure specification considers reduction of waste and the promotion of reuse throughout supply chain where a ppropriate. Commitments can be tested through quality questions in Social Value Questionnaire and contract management. | Reduce the use of paper in procurement projects | Procurement |
|-------|---|--|--|-------------|
| DCL40 | Encourage suppliers to take action to reduce waste and promote reuse throughout the supply chain | Requesting information on processes during procurements where appropriate. Ensure specification considers reduction of waste and the promotion of reuse throughout supply chain where appropriate. Commitments can be tested through quality questions in Social Value Questionnaire and contract management. | Promote the Council as a 'green' Council and reduce its associated waste. | Procurement |
| DCL41 | Encourage suppliers to seek sustainable a lternatives to materials which are scarce or at risk of becoming so. | Requesting information on processes during procurements where appropriate. Products are considered through the Environmental impact assessment stage and then during evaluation of the supplier returns. Ensure specification considers use of sustainable materials were appropriate. Commitments can be tested through quality questions in Social Value Questionnaire. | Use of sustainable materials, reducing the risk of having to replace unavailable parts in the future | Procurement |

| DCL42 | Encourage suppliers to be aware of the harmful impacts of greenhouse gases including and in addition to CO2 and to take steps to reduce emissions in addition to CO2 reduction. | Ensure specification considers use of reduction of CO2 were appropriate. Commitments can be tested through quality questions in Social Value Questionnaire and in terms and conditions. | Working towards the Councils continued reduction in CO2 and associated greenhous e gases. | Procurement |
|-------|---|---|--|----------------|
| DCL43 | Consider the potential transport requirements associated with any contract and how these may be minimised, whilst encouraging suppliers to minimise the negative impact of their transport operations. | Monitor and consider locality during procurement process where a ppropriate and allowable to do so. Ensure specification considers minimisation of negative transport were appropriate. Commitments can be included in the terms and conditions. | Provide opportunities for local businesses and promote local economy whilst reducing the carbon footprint of the Council | Procurement |
| DCL44 | Move the Council to a more automated service through simplification and standardisation of processes | Deliver the Digital Operating Model | Reduce the impact on the environment by consolidating processes, reducing use of paper forms and improving the accessibility of the Councils services | Transformation |

Priority 2- Building Community Resilience

| | 2.0 Supporting loca | I communities to help them become resilient to | the impacts of climate chang | e |
|-----------|--|---|--|--------------------------|
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| BCR1 | Continue supplementary planning document (SPD) to ensure that developers integrate sustainable surface water management into new developments. Developers to provide sustainable drainage systems for the disposal of surface water and rainwater, so that it is retained either on site or within the immediate area. | Sustainable Drainage System (SuDS) SPD adopted February 2018 and now us ed to assess local planning applications. This is to be reviewed as per the Local Flood Risk Management Strategy (LFRMS) 2022 to make s ure that it still aligns with the relevant guidance and climate change allowances for planning. | Increased number of planning applications assessed using the SuDS SPD resulting in reduced instances of flooding in new developments and surface water dealt with in a more sustainable way. | Resilience Team/Planning |
| BCR2 | Understand and manage flood risk to helpindividuals, communities, businesses and other authorities in Bedford prepare and respond to flood events. | Implement Bedford Borough Council's Local Flood Risk Management Strategy 2022 over the next five years. | Delivery of the Local Flood Risk Management Strategy Action Plan. The focus of the strategy is around building resilience into the Borough, communities and businesses so that we can adapt to the changes and challenges faced around climate change. | Resilience Tea m |
| BCR3 | Promote the benefits of, and support access to, the natural environment and green spaces | To distribute information regarding benefits of accessing green spaces and work with partners to raise a wareness. Encourage projects on natural environment through the suicide prevention community grant scheme. | Access to the natural environment and green spaces contributes to positive mental health and wellbeing and encourages residents to become more physically active. It als ohelps improve | Public Health |

| | | | environmental quality including air pollution and green spaces alsosupport local biodiversity; help to improve air quality and reduce flood risk. | |
|-----------|---|--|---|--|
| BCR4 | Identify residents in fuel poverty in Bedford Borough | Work with primary care data processors to identify those who are likely to be in fuel poverty. | Ability to share information and help those who need it most. | Public Health, Environment |
| BCR5 | Support funding opportunities to retrofit fuel poor homes | Identify ways to facilitate these funding opportunities if possible to provide support to residents in fuel poverty and improve the quality of their homes. | Improve the energy efficiency of fuel poor homes, resident's health and mental wellbeing. Retrofitting homes with low carbon technologies will also reduce the carbon footprint of the Borough. | Public Health, Environment |
| | 2.1 Suppo | rting local businesses to help them become resil | ient to climate change | |
| Reference | | | | |
| Nelelence | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| BCR6 | What we want to achieve Raise a wareness of funding opportunities a vailable to businesses in the Borough to support them in their drive to become more energy efficient | How we will achieve it Promote the Carbon Trust's Green Business Fund and Carbon Trust's START2ACT scheme. Linked up with Low Carbon Workspaces Grants to promote match-funded grants for SME's to help with low carbon project costs | Outcomes Increase number of businesses in the Borough accessing Carbon Trust funding/support | Responsibility Business Development & Environmental Efficiency Team/Economic Development |

| BCR8 | Raising a wareness of resources, news and opportunities out there around all green issues | Promote Green focused webinars led by our service partners (e.g. SEMLEP, GBN, Cranfield etc.). Promote and encourage more local businesses to join Green Connectors and the Green Business Network via monthly newsletter and twitter. Highlight that Government can offer environmental taxes, reliefs and schemes for businesses that adopt green strategies. | Increase attendance at these events to encourage networking and knowledge sharing of new initiatives. Joining networks will help to understand the benefits of going green and the ability to receive personalised support. | Economic Development |
|-----------|---|---|--|--|
| BCR9 | Encourage businesses to ensure they have up to date business continuity plans in place | Link with Bedfordshire Resilience Forum (BLRF) to promote business continuity to local businesses. | Promotion of business continuity through BLRF and the council website. Event organised through BLRF as part of Business Continuity Awareness Week each year | Resilience Tea m |
| BCR10 | Investigate funding opportunities to develop green skills in the Borough | Apply for funding schemes to support projects to encourage people to upskill for green jobs. | Increased number of residents trained for green jobs. | Economic Development |
| | 2.2 9 | Supporting local communities with sustainable t | ransport choices | |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| BCR11 | Support and promote the use of a wide range of alternative transport options such as buses, trains and cycling | Publicise, sign and improve viable cycle network Assess and improve quality of footway network Promote benefits of walking and cycling, with assistance of Public Health Funding for promotion to schools and businesses Air-Care project to promote sustainable transport to help improve air quality Promote the use of bus services a cross Bedford Borough through various campaigns | Improve air quality. Increase in the number of walking and cyclingjourneys to Bedford Town Centre. Public Health Outcomes Framework (PHOF) | Sustainable Transport Team/ Sports Development/ Children's services /Air Quality Steering Group Public Health |
| BCR12 | Work within the remit of the England's Economic Heartland | Deliver and review the Transport Plan and associated strategies within the national context. | Reduce congestion, decarbonise transport, improve | Transport Policy Team |

| | Transport Strategy and the Govt's Transport Decarbonisation Plan | | a ir quality and increase active travel | |
|-----------|---|---|---|--|
| BCR13 | Promote walking and cycling through investment in infrastructure | Deliver the cycle and pedestrian improvements through Town Deal funding. Develop and publish the LCWIP (Local Cycling and Walking Infrastructure Plan). Implementing through the implementation of extant policy and through the emerging LP2040, including in the Strategic Framework for the South of Bedford area. | Increase in the number of walking and cycling resulting in improved general health and wellbeing of residents in Bedford Borough | Sustainable Transport Team/ Planning and Highways/ Public Health |
| BCR14 | Develop and deliver the LCWIP (Local Cycling and Walking Infrastructure Plan) | Adopt and publish the plan on Council's website. Deliver the cycle and pedestrian improvements through Town Deal funding. Cycle network to be included in future Local Plan. Cycle Network has been re-signed in 2021 | Increase cycling and walking within Bedford Borough | Transport |
| BCR15 | Support the development of local electric vehicle charging points and increase the number of these in Bedford Borough in response to expected demand for electric vehicle usage and Central Government target to ban the sale of combustion engine cars (petrol and diesel) by 2030. | Develop contracts with EV charge point suppliers to expand the local charging network. Continue to incorporate EV charge point provision into planning policies. | Work with Bedford EV community to understand demand for charging facilities. Increase the number of charging point. Policies included in Bedford Borough Local Plan 2030Policies included in Bedford Borough Local Plan 2030. | Transport / Highways |
| | | on of low carbon buildings and communities wi | thin new and existing develop | |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| BCR16 | Continue using planning policies that actively encourage renewable and decentralised energy generation. | Local Plan policy a dopted January 2020. Subject to central government changes to Building regulations and the upcoming future homes standards, planning policy will be updated as and when new legislation is released. | Increase in renewable energy developments and heat network opportunities | Planning |

| BCR17 | Use planning policy to require developers to build homes and other buildings with high energy standards and low embodied energy. | Local Plan policy adopted January 2020. Issues associated with energy use are being addressed in area and site specific SPDs. | Improved standards of housing and mitigate against risks of fuel poverty | Planning |
|-------|---|--|--|---|
| BCR18 | Establish policies that encourage developers to design new developments that will encourage walking, cycling and public transport us e. | Identify opportunities to improve green space and connectivity between sites to promote walking and cycling and that contribute to the emerging Bedford Cycle Network through a dopted development plan policies. This principle is reflected in the location of proposed development in the LP2040, picking up on the 15/20 minute neighbourhoods, and good active travel connectivity between settlements | Retaining and improving existing open spaces, sport and recreation facilities and providing a network of diverse, multi-functional open spaces that is accessible to all. | Planning/ Transport / Clean safe and green |
| BCR19 | Ensure that new developments avoid areas prone to flooding where possible; or in instances where development in the floodplain is necessary, that it is safe for its lifetime, resilient and does not increase flood risk elsewhere. | Local Plan policy adopted January 2020. Implementation of existing national and local policies is ongoing. New Strategic Flood Risk As sessment for the Borough completed. Site selection for LP2040 avoids development on land liable to flood in line with national policy. | Limit flooding in new built areas, includings ubsidence and ground pollution. | Planning |
| BCR20 | Maintain policies to reduce water use in new and existing buildings. | Local Plan policy a dopted January 2020. | Reduced water consumption | Planning |
| BCR21 | Support policies that support sustainable drainage systems. | Sustainable Drainage System (SuDS) SPD a dopted February 2018. Local Plan policy a dopted January 2020 | Improved drainage systems and reduce flooding | Planning |

| BCR22 | Establish policies that support green and blue infrastructure and promote green space and biodiversity. | Local Plan policy adopted January 2020. Subject to central government changes to Building regulations and the upcoming future homes standards, planning policy will be updated as and when new legislation is released. | Greener developments which improve health and wellbeing for the local residents | Planning |
|-----------|---|--|--|----------------------|
| BCR23 | Raise the profile of planning policies that support a move to carbon neutrality | Submission draft plan of the Local Plan 2040 prepared. Policy DS1 (S) Resources and Climate Change included as an overarchings trategic policy. | Raises awareness on net zero planning policies | Planning |
| | 2.4 Support the reduction i | n emissions from transport and encourage susta | ainable transport in new deve | lopments |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |
| BCR24 | Ensure that high quality cycle parking standards are applied in new devel opments | Standards included in a dopted Parking Standards for Sustainable Communities SPD | Sufficient cycle parking provided that will encourage cycle use and increased opportunities for Active Travel | Transport / Planning |
| BCR25 | Ensure coordinated provision of electric vehicle infrastructure a cross the borough. | Local Plan policy a dopted January 2020. Subject to central government changes to Building regulations and the upcoming future homes standards, planning policy will be updated as and when new legislation is released. | Coordinated provision of electric vehicle infrastructure. | Transport / Planning |
| BCR26 | Provide Sustainable Transport a dvice and comments on Transport Assessments and Travel Plans when required by the planning process. | Through the planning process. Employment of Travel Plan Officer, as long as funding is available, to work with schools, businesses and new developments. | Increase sustainable development | Transport / Planning |
| BCR27 | Deliver the Air Quality Strategy | Produce Air Quality Reports to DEFRA | Monitor Air quality in Bedford to influence any future decisions | Regulatory Services |
| | 2.5 Ensure open sp | aces including parks and recreation are resilient | to predicted climate changes | 5 |
| Reference | What we want to achieve | How we will achieve it | Outcomes | Responsibility |

| BCR28 | Ensure facilities from new developments are resilient to seasonal changes through appropriate design and implementation | Work with developers and colleagues on open space provision, resilient tree and shrub species, sustainable urban drainage systems (SUDS) - section 106. The Open Space SPD is used for all planning applications. New biodiversity net gains requirements for developments should strengthen this going forward. | Fewer instances of flooding, improved air quality and improving the aesthetics of the area | Business Development & Environmental Efficiency Team |
|-------|---|--|---|--|
| BCR29 | Increase water retention and water conservation methods | As sess tree and shrub planting schedules to lesson need for spring and summer watering. Consider planting drought tolerant species and plants that do not require additional watering. Investigate water harvesting methods. | Reduce water consumption in parks and open spaces | Clean Safe and Green |
